Work Experience

Akamai Technologies

September 2023 - Present

Senior Software Engineer

- Led the migration of legacy DNS-Based Management applications from AngularJS to Angular 19 enhancing maintainability, scalability and performance by 30%
- Analysed existing application functionality and decomposed it into feature-based tickets for efficient development tracking.
- Developed reusable components, ensured coding best practices, and conducted thorough code reviews.
- Achieved 80%+ unit test coverage across modules, significantly reducing post-deployment bugs and improving system reliability.

Publicis Sapient

August 2021 – September 2023

Senior Associate L1 developer

- Developed and maintained enterprise-grade web applications using Angular (v14+), React, D3.js, and CSS for two high-impact platforms in the performance analytics and e-commerce domains.
- Designed and implemented intuitive dashboards in PSknowHOW using D3.js, enabling organizations to track transformation KPIs visually; contributed across the full SDLC including requirements gathering, UI design, development, unit testing (Karma), defect fixing, and code reviews.

- Delivered responsive and scalable Products & Services modules for Verizon's e-commerce platform using Angular, enhancing customer experience and supporting wireless product workflows.
- Ensured seamless integration with backend systems and adhered to performance and accessibility best practices, resulting in a 25% improvement in load times and user engagement.

Diverse Lynx India Private Limited

October 2020 To August 2021

Senior UI Developer

- Developed UI screens for core banking modules including Customers, Accounts.
- Responsible for requirement gathering, UI design, component development, and unit testing.

Infosys Limited

October 2020 To August 2021

Systems Engineer

- Developed a search tool for healthcare providers to retrieve medical bill statuses, significantly improving operational efficiency and reducing response time by eliminating call center dependencies.
- Developed a LinkedIn Profile Import connector to streamline Jive community onboarding by enabling users to import LinkedIn profile data. Built using Angular, Node.js, HTML/CSS, Bootstrap 3, PostgreSQL, and OAuth 2.0; version control with Git.

Education

Bachelor of Science— Information Technology

2013-2016

SIES College of Arts, Science and Commerce

Master of Science— Information Technology

2018-2020

SIES College of Arts, Science and Commerce
